Clinical Laboratory Detection of AmpC β -Lactamase: Does It Affect Patient Outcome?

Kenneth H. Rand, Bradley Turner, Hilary Seifert, Christine Hansen, Judith A. Johnson, and Andrea Zimmer, 572

Evaluation of a Real-Time PCR Assay for the Detection of the *Klebsiella pneumoniae* Carbapenemase Genes in Microbiological Samples in Comparison With the Modified Hodge Test

Aditya Raghunathan, Linoj Samuel, and Robert J. Tibbetts, 566

In Situ Hybridization for Specific Fungal Organisms in Acute Invasive Fungal Rhinosinusitis

Kathleen T. Montone, Virginia A. LiVolsi, Donald C. Lanza, David W. Kennedy, James Palmer, Alexander G. Chiu, Michael D. Feldman, Laurie A. Loevner, and Irving Nachamkin, 190

Procalcitonin as a Marker for the Detection of Bacteremia and Sepsis in the Emergency Department

Stefan Riedel, Johan H. Melendez, Amanda T. An, Janet E. Rosenbaum, and Jonathan M. Zenilman, 182

SPECIAL ARTICLES

A National Agenda for the Future of Pathology in Personalized Medicine

Peter J. Tonellato, James M. Crawford, Mark S. Boguski, and Jeffrey E. Saffitz, 668

Pathology Consultation on Reporting of Critical Values

Jonathan R. Genzen and Christopher A. Tormey, for the Education Committee of the Academy of Clinical Laboratory Physicians and Scientists, 505

Pathology Consultation on Warfarin Pharmacogenetic Testing

Gary Stack, for the Education Committee of the Academy of Clinical Laboratory Physicians and Scientists, 13

Pathology Subspecialty Fellowship Application Reform, 2007–2010

James M. Crawford, Robert D. Hoffman, and W. Stephen Black-Schaffer, 338

subject index

Index of Issues: January, pp 1-176; February, pp 177-328; March, pp 329-488; April, pp 489-656; May, pp 657-808; June, 809-984.

A

- ABO blood-group system, ABO blood type and longevity, 96
- Abstracts of Papers, 313
- Activated clotting time (ACT), *i-STAT* kaolin test in different clinical settings in large academic urban medical center, clinical evaluation of, and comparison with Medtronic ACT Plus, 741
- Activated partial thromboplastin time (aPTT), and "spiked curve" method for monitoring unfractionated heparin therapy, inaccuracy of, 870
- Acute coronary syndrome, and rapid detection of myocardial infarction with a sensitive troponin test, 424
- ADAMTS13, thrombotic microangiopathic hemolytic anemia with reduction of activity of, as initial manifestation of childhood-onset systemic lupus erythematosus, 406
- Adenocarcinoma
- adenosquamous carcinoma of the lung, a microdissection study of *KRAS* and *EGFR* mutational and amplification status in a Western patient population, 783
 - primary, of the urinary bladder, value of cell cycle biomarkers, 822
- Ampulla of Vater, carcinoma of, phenotypic and genotypic characterization of, has prognostic and putative therapeutic implications, 202
- Anemia
- microcytic, role of automated measurement of RBC subpopulations in differential diagnosis of β -thalassemia and, 374
 - refractory, with ring sideroblasts associated with marked thrombocytosis, as mixed group exhibiting a spectrum of morphologic findings, 398
 - thrombotic microangiopathic hemolytic, with reduction of ADAMTS13 activity, as initial manifestation of childhood-onset systemic lupus erythematosus, 406
- Angiofollicular lymphoid hyperplasia. *See* Castleman disease
- Angiopathies, Degos disease as, 599
- Antibodies, antinuclear, enzyme-linked immunosorbent assay screening then indirect immunofluorescence confirmation of, 678
- Antibodies, monoclonal, equivocal immunohistochemical results with anti-HER2/neu antibodies A0485 and SP3, comparison with corresponding FISH results in routine clinical practice, 845
- Anticoagulation
- European Concerted Action on Anticoagulation lyophilized plasmas for INR derivation using the PT/INR Line, evaluation of, 732
 - "spiked curve" method for monitoring unfractionated heparin therapy, inaccuracy of, 852
- Anti-HLA antibodies, results of HLA antibody testing using ELISA vs the fluorescent bead method and retrospective review of data for recipients of packed RBCs and platelets from male HLA-immunized donors, 90
- Antinuclear antibodies. *See* Antibodies, antinuclear
- Antiphospholipid syndrome, and thrombotic microangiopathic hemolytic anemia with reduction of ADAMTS13 activity, as initial manifestation of childhood-onset systemic lupus erythematosus, 406
- Anus neoplasms, HPV L1 capsid protein detection and progression of anal squamous neoplasia, 436
- Apnea, and concordance of butyrylcholinesterase phenotype with genotype, implications for biochemical reporting, 271
- Apoptosis, *KRAS* gene mutation in colorectal cancer is correlated with increased proliferation and spontaneous, 245
- Archives, pathology, evaluation of integrity, regulatory compliance, and construction of searchable database from print reports, 753
- Aspergillus*, acute invasive fungal rhinosinusitis, in situ hybridization for specific fungal organisms in, 190
- ATHENA HPV study, high-risk human papillomavirus testing in women with ASC-US cytology, results from, 468
- Atypia of undetermined significance
- predictive value of fine-needle aspiration diagnosis "suspicious for a follicular neoplasm, Hürthle cell type" in patients with Hashimoto thyroiditis, 139
 - in thyroid fine-needle aspirations, clinical outcome for, should repeated FNA be the preferred initial approach?, 770
- Atypical squamous cells of undetermined significance (ASC-US), high-risk human papillomavirus testing in women with ASC-US cytology, results from the ATHENA HPV study, 468
- Automated hematology analyzers
- Beckman Coulter UniCel DxH 800 and Abbott Diagnostics Cell-Dyn Sapphire hematology analyzers on pediatric and neonatal specimens in a tertiary care hospital, evaluation of, 929
 - Beckman Coulter UniCel DxH 800, Beckman Coulter LH 780, and Abbott Diagnostics Cell-Dyn Sapphire hematology analyzers on adult specimens in tertiary care hospital, evaluation of, 939

B

- Bacteremia**
 clinical laboratory detection of AmpC β -lactamase, does it affect patient outcome?, 572
 procalcitonin as marker for detection of sepsis and, in the emergency department, 182
- Bacterial infections.** *See also* Bacteremia
Chlamydia psittaci infection in nongastrointestinal extranodal MALT lymphomas and their precursor lesions, 70
- B-cell lymphoma**
 diffuse large
 stromal cell marker SPARC predicts for survival in patients with, treated with rituximab, 54
 XCR1 expression and biased V_H gene usage are distinct features of, initially manifesting in the bone marrow, 556
 HGAL and LMO2 in separation of lymphomas derived from small B cells in nodal and extranodal sites, including bone marrow, efficacy of, 697
 with hyaline vascular Castleman disease-like features, a clinicopathologic study, 901
- BCHE** gene, and concordance of butyrylcholinesterase phenotype with genotype, implications for biochemical reporting, 271
- Biomarkers.** *See also* Tumor markers
 procalcitonin as a marker for the detection of bacteremia and sepsis in the emergency department, 182
- Bladder neoplasms.** *See* Urinary bladder neoplasms
- bla_{KPC}** genes, evaluation of a real-time PCR assay for the detection of *Klebsiella pneumoniae* carbapenemase genes in microbiological samples in comparison with modified Hodge test, 566
- Blood.** *See* ABO blood-group system; Coagulation
- Blood cell count, complete.** *See* Complete blood cell count
- Blood components, utilization management in a large urban academic medical center, a 10-year experience, 108**
- Bloodstream infections, procalcitonin as marker for detection of bacteremia and sepsis in the emergency department, 182**
- Blood transfusion.** *See* Transfusion
- "Blue dot" projects, 670**
- Bone marrow**
 diagnostic yield of bone marrow and peripheral blood FISH panel testing in clinically suspected myelodysplastic syndromes and/or acute myeloid leukemia, a prospective analysis of 433 cases, 915
 HGAL and LMO2 in separation of lymphomas derived from small B cells in nodal and extranodal sites, including, efficacy of, 697
 quantitative assessment of myeloid nuclear differentiation antigen distinguishes myelodysplastic syndrome from normal, 380
 residual monotypic plasma cells in patients with Waldenström macroglobulinemia, after therapy, 365
 XCR1 expression and biased V_H gene usage are distinct features of diffuse large B-cell lymphoma initially manifesting in, 556
- Book Review, 646**
- Breast neoplasms**
 carcinoma
 effect of delay in fixation, different fixatives, and duration of fixation in estrogen and progesterone receptor results in, 592
 equivocal immunohistochemical results with anti-HER2/neu antibodies A0485 and SP3, comparison with corresponding FISH results in routine clinical practice, 845

- hormone receptor status rather than HER2 status is significantly associated with increased Ki-67 and p53 expression in triple-negative, and high expression of Ki-67 but not p53 is significantly associated with axillary nodal metastasis in triple-negative and high-grade non-triple-negative, 230
 invasive, gross cystic disease fluid protein 15 and mammaglobin expression, relationship between molecular subtype and, 587
 multisite performance study comparing the reading of immunohistochemical slides on a computer monitor with conventional manual microscopy for estrogen and progesterone receptor analysis, 461
 UK NEQAS ISH multicenter ring study using the Ventana HER2 dual-color ISH assay, 157
- Butyrylcholinesterase, concordance of phenotype with genotype, implications for biochemical reporting, 271**

C

- C5b-9, in Degos disease, 599**
- Calcium homeostasis disorders, multivariate analysis of clinical, demographic, and laboratory data for classification of, 100**
- Candida, Affirm VPIII and Papanicolaou tests in the detection of infectious vaginitis, comparison of, 442**
- Carbapenemase, *Klebsiella pneumoniae*, evaluation of a real-time PCR assay for detection of genes in microbiological samples in comparison with the modified Hodge test, 566**
- Carcinoembryonic antigen, and measurement of circulating cell-free DNA levels by a new simple fluorescent test in patients with primary colorectal cancer, 264**
- Carcinoma**
 adenosquamous, of the lung, a microdissection study of *KRAS* and *EGFR* mutational and amplification status in a Western patient population, 783
 basaloid squamous cell of the esophagus, common genomic aberrations in carcinosarcoma and, detected by CGH and array CGH, 579
- of breast**
 effect of delay in fixation, different fixatives, and duration of fixation in estrogen and progesterone receptor results in, 592
 equivocal immunohistochemical results with anti-HER2/neu antibodies A0485 and SP3, comparison with corresponding FISH results in routine clinical practice, 845
 hormone receptor status rather than HER2 status is significantly associated with increased Ki-67 and p53 expression in triple-negative, and high expression of Ki-67 but not p53 is significantly associated with axillary nodal metastasis in triple-negative and high-grade non-triple-negative, 230
 invasive, gross cystic disease fluid protein 15 and mammaglobin expression, relationship between molecular subtype and, 587
 colorectal, *KRAS* gene mutation is correlated with increased proliferation and spontaneous apoptosis, 245
 of gallbladder, early, a clinicopathologic study of 13 cases of intramucosal, 637
 Merkel cell and small cell lung, TdT expression in, 831
 oropharyngeal squamous cell, detection of human papillomavirus using Hybrid Capture 2 in oral brushings from patients with, 766

- of papilla of Vater, phenotypic and genotypic characterization of, has prognostic and putative therapeutic implications, 202
- pure sarcomatoid, of maxillary sinus and nasal cavity, simulating malignant fibrous histiocytoma, 128
- Carcinosarcoma, and basaloid squamous cell carcinoma of the esophagus, common genomic aberrations in, detected by CGH and array CGH, 579
- Cardiac markers, rapid detection of myocardial infarction with a sensitive troponin test, 424
- Castleman disease, hyaline vascular, B-cell lymphoma with features like those of, 901
- β -Catenin, as useful adjunct immunohistochemical marker for diagnosis of pulmonary lymphangioleiomyomatosis, 776
- CD11, flow cytometry rapidly identifies all acute promyelocytic leukemias with high specificity independent of underlying cytogenetic abnormalities, 76
- CD14, immunohistochemical analysis of monocytic leukemias, usefulness of Krüppel-like factor 4 and, 720
- CD23, expression in follicular lymphoma, clinicopathologic correlations, 46
- CD33, and histologic and immunohistologic characterization of skin localization of myeloid disorders, a study of 173 cases, 278
- CD68
 - and histologic and immunohistologic characterization of skin localization of myeloid disorders, a study of 173 cases, 278
 - stromal cell marker SPARC predicts for survival in patients with diffuse large B-cell lymphoma treated with rituximab, 54
- CD117, flow cytometry rapidly identifies all acute promyelocytic leukemias with high specificity independent of underlying cytogenetic abnormalities, 76
- CD123, and histologic and immunohistologic characterization of skin localization of myeloid disorders, a study of 173 cases, 278
- CDX2, and phenotypic and genotypic characterization of carcinomas of the papilla of Vater has prognostic and putative therapeutic implications, 202
- Cell cycle, and primary adenocarcinoma of the urinary bladder, value of cell cycle biomarkers, 822
- Cell-Dyn Sapphire
 - and Beckman Coulter UniCel DxH 800 and Beckman Coulter LH 780 analyzers on adult specimens in tertiary care hospital, evaluation of, 939
 - and Beckman Coulter UniCel DxH 800 hematology analyzer on pediatric and neonatal specimens in a tertiary care hospital, evaluation of, 929
- Cell-free DNA, circulating, measurement of levels by a new simple fluorescent test in patients with primary colorectal cancer, 264
- Central nervous system diseases, Degos disease, a C5b-9/interferon- α -mediated endotheliopathy syndrome, 599
- Cerebrospinal fluid, flow cytometric immunophenotyping of specimens of, 22
- Cervical cytology. *See* Papanicolaou smear
- Cervical intraepithelial neoplasia
 - high-grade, p16 and ProExC immunostaining in the detection of cervical carcinoma and, efficacy of, 212
 - high-risk human papillomavirus testing in women with ASC-US cytology, results from the ATHENA HPV study, 468
- population-based clinical trial comparing endocervical high-risk HPV testing using Hybrid Capture 2 and Cervista from the SHENCCAST II study, 790
- Cervical neoplasms. *See* Uterine cervical neoplasms
- Cervista HPV DNA test, population-based clinical trial comparing endocervical high-risk HPV testing using Hybrid Capture 2 and, from the SHENCCAST II study, 790
- Check Sample Abstracts*, 313
- Chemokine receptors, XCR1 expression and biased V_H gene usage are distinct features of diffuse large B-cell lymphoma initially manifesting in the bone marrow, 556
- Children, Beckman Coulter UniCel DxH 800 and Abbott Diagnostics Cell-Dyn Sapphire hematology analyzers on pediatric and neonatal specimens in a tertiary care hospital, evaluation of, 929
- Chlamydia psittaci*, infection in nongastrointestinal extranodal MALT lymphomas and their precursor lesions, 70
- Cholestasis, and hepatocyte cytokeratin 7 expression in chronic allograft rejection, 238
- Cholinesterase, and concordance of butyrylcholinesterase phenotype with genotype, implications for biochemical reporting, 271
- Chromogenic in situ hybridization (CISH), UK NEQAS ISH multicenter ring study using the Ventana *HER2* dual-color ISH assay, 157
- Chromosome deletion, of chromosome 20q, a recurrent cytogenetic abnormality in patients with chronic myelogenous leukemia in remission, 391
- Chronic allograft rejection, hepatocyte cytokeratin 7 expression in, 238
- Circulating tumor cells. *See* Neoplastic cells, circulating
- Classification and regression tree (CART), in multivariate analysis of clinical, demographic, and laboratory data for classification of disorders of calcium homeostasis, 100
- Clonality, T-cell, flow cytometric immunophenotypic assessment by V_β repertoire analysis, detection at diagnosis and monitoring of minimal residual disease following therapy, 890
- CME/SAM Questions, 163, 310, 476, 643, 796, 974
- Coagulation. *See also* Anticoagulation
 - clinical evaluation of *i*-STAT kaolin activated clotting time (ACT) test in different clinical settings in large academic urban medical center, comparison with Medtronic ACT Plus, 741
- Cognate antigens, and results of HLA antibody testing using ELISA vs the fluorescent bead method and retrospective review of data for recipients of packed RBCs and platelets from male HLA-immunized donors, 90
- Colorectal neoplasms
 - KRAS* gene mutation is correlated with increased proliferation and spontaneous apoptosis, 245
 - primary, measurement of circulating cell-free DNA levels by a new simple fluorescent test in patients with, 264
 - visualizing pretumor progression in the gastrointestinal tract, 878
- Colposcopy, value of repeated cytology at the time of first, a retrospective analysis of 1,087 cases, 628
- Communication, of pathology and laboratory errors, anatomic pathologists' and laboratory medical directors' attitudes and experiences, 760
- Comparative genomic hybridization, common genomic aberrations in basaloid squamous cell carcinoma and carcinosarcoma of the esophagus detected by, and array CGH, 579

Complete blood cell count

- Beckman Coulter UniCel DxH 800 and Abbott Diagnostics Cell-Dyn Sapphire hematology analyzers on pediatric and neonatal specimens in a tertiary care hospital, evaluation of, 929
- Beckman Coulter UniCel DxH 800, Beckman Coulter LH 780, and Abbott Diagnostics Cell-Dyn Sapphire hematology analyzers on adult specimens in tertiary care hospital, evaluation of, 939

Computers

- effects of computerized transfusion decision support system on physician compliance and its appropriateness for fresh frozen plasma use in a medical center, 417
- multisite performance study comparing the reading of immunohistochemical slides on a monitor with conventional manual microscopy for estrogen and progesterone receptor analysis, 461

Consultations, pathology. *See* Pathology consultations

- Core needle biopsy, and fine-needle aspiration combined with ancillary studies correlate highly with traditional techniques in the diagnosis of nodal-based lymphoma, 516

Correction, 485

Correspondence, 167, 480, 649, 798, 977

- Cost containment, utilization management in a large urban academic medical center, a 10-year experience, 108

Critical values, reporting, 505

- Cycle sequencing, *KRAS* gene mutation in colorectal cancer is correlated with increased proliferation and spontaneous apoptosis, 245

- Cyclooxygenase-2 (COX-2), and galectin-3 and nm-23 expression could potentially discriminate between benign and malignant pheochromocytoma, 454

- CYP2C9* gene, and pathology consultation on warfarin pharmacogenetic testing, 13

Cytogenetics

- comparative analysis of molecular genetic and conventional cytogenetic detection of diagnostically important translocations in more than 400 cases of acute leukemia, highlighting the frequency of false-negative conventional, 921
- diagnostic yield of bone marrow and peripheral blood FISH panel testing in clinically suspected myelodysplastic syndromes and/or acute myeloid leukemia, a prospective analysis of 433 cases, 915
- and flow cytometry rapidly identifies all acute promyelocytic leukemias with high specificity independent of underlying cytogenetic abnormalities, 76

Cytokeratins

- cytokeratin 7 and 20, and phenotypic and genotypic characterization of carcinomas of the papilla of Vater has prognostic and putative therapeutic implications, 202
- hepatocyte cytokeratin 7 expression in chronic allograft rejection, 238

D

- Databases, pathology archive, evaluation of integrity, regulatory compliance, and construction of searchable database from print reports, 753

Degos disease, 599

Deletion, chromosome. *See* Chromosome deletion

- Dendritic cells, plasmacytoid, and histologic and immunohistologic characterization of skin localization of myeloid disorders, a study of 173 cases, 278

Diabetes mellitus

- hemoglobin A_{1c} testing alone does not sufficiently identify patients with prediabetes, 674
- low vitamin D levels correlate with the proinflammatory state in type 1 diabetic subjects with and without microvascular complications, 429

Differential leukocyte count. *See* Leukocyte count

- Digital imaging, multisite performance study comparing the reading of immunohistochemical slides on a computer monitor with conventional manual microscopy for estrogen and progesterone receptor analysis, 461

- Disease progression, visualizing pretumor progression in the gastrointestinal tract, 878

DNA

- changing spectrum of DNA-based specimen provenance testing in surgical pathology, 132
- circulating cell-free, measurement of levels by a new simple fluorescent test in patients with primary colorectal cancer, 264

- DOG1 antibody, as highly sensitive and specific marker for gastrointestinal stromal tumors in cytology cell blocks, 448

- Drugs, therapeutic, pseudo-Pelger-Huët anomaly induced by medications, a clinicopathologic study in comparison with myelodysplastic syndrome-related pseudo-Pelger-Huët anomaly, 291

- Ductopenia, and hepatocyte cytokeratin 7 expression in chronic allograft rejection, 238

- Dyscrasia, pilotropic T-cell, folliculotropic T-cell lymphocytosis as distinct form of, 221

E

- EGFR* gene, adenosquamous carcinoma of the lung, a microdissection study of *KRAS* and *EGFR* mutational and amplification status in a Western patient population, 783

- Emergency department, procalcitonin as marker for detection of bacteremia and sepsis in, 182

- Endocervix, aberrant expression of TFF1, TFF2, and PDX1 and their diagnostic value in lobular endocervical glandular hyperplasia, 253

- Endotheliopathy syndromes, Degos disease as, 599

Enzyme-linked immunosorbent assay (ELISA)

- results of HLA antibody testing using ELISA vs the fluorescent bead method and retrospective review of data for recipients of packed RBCs and platelets from male HLA-immunized donors, 90

- screening then indirect immunofluorescence confirmation of antinuclear antibodies, 678

Erythrocytes. *See* Red blood cells (RBCs)

- Erythrocyte sedimentation rate, measured by the Streck ESR-Auto Plus is higher than with the Sedioplast Westergren method, a validation study, 386

- Escherichia coli*, clinical laboratory detection of AmpC β -lactamase, does it affect patient outcome?, 572

- Esophageal neoplasms, basaloid squamous cell carcinoma and carcinosarcoma, common genomic aberrations in, detected by CGH and array CGH, 579

Estrogen receptor

- effect of delay in fixation, different fixatives, and duration of fixation in estrogen and progesterone receptor results in breast carcinoma, 592
- hormone receptor status rather than HER2 status is significantly associated with increased Ki-67 and p53 expression in triple-negative breast carcinomas, and high expression of Ki-67 but not p53 is significantly associated with axillary nodal metastasis in triple-negative and high-grade non-triple-negative breast carcinomas, 230
- multisite performance study comparing the reading of immunohistochemical slides on a computer monitor with conventional manual microscopy for analysis of progesterone receptor and, 461
- Ethics, medical, and pathology archive, evaluation of integrity, regulatory compliance, and construction of searchable database from print reports, 753
- European Concerted Action on Anticoagulation, lyophilized plasmas for INR derivation using the PT/INR Line, evaluation of, 732

F

- Fellowships and scholarships, pathology
 - matching residents to, 335
 - subspecialty fellowship application reform, 2007-2010, 338
- Fine-needle aspiration biopsy
 - clinical outcome for atypia of undetermined significance in thyroid aspirations, should repeated FNA be the preferred initial approach?, 770
 - and core needle biopsy combined with ancillary studies correlate highly with traditional techniques in the diagnosis of nodal-based lymphoma, 516
 - independent diagnostic accuracy of flow cytometry obtained from aspirates, a 10-year experience with 451 cases, 304
 - predictive value in "suspicious for a follicular neoplasm, Hürthle cell type" in patients with Hashimoto thyroiditis, 139
 - of thyroid
 - interobserver reproducibility using UK Royal College of Pathologists' classification system, 852
 - repeatedly nondiagnostic, significance of, 750
- Fixation, tissue. *See* Tissue fixation
- Flow cytometry
 - immunophenotyping by
 - assessment of T-cell clonality by V_{β} repertoire analysis, detection of clonality at diagnosis and monitoring of minimal residual disease following therapy, 890
 - CD23 expression in follicular lymphoma, clinicopathologic correlations, 46
 - of cerebrospinal fluid specimens, 22
 - combined core needle biopsy and fine-needle aspiration with ancillary studies correlate highly with traditional techniques in the diagnosis of nodal-based lymphoma, 516
 - independent diagnostic accuracy of flow cytometry obtained from fine-needle aspirates, a 10-year experience with 451 cases, 304
 - rapidly identifies all acute promyelocytic leukemias with high specificity independent of underlying cytogenetic abnormalities, 76

- residual monotypic plasma cells in patients with Waldenström macroglobulinemia after therapy, 365
- multiparametric, in detecting composite lymphoma, usefulness of, study of 17 cases in a 12-year period, 541
- quantitative assessment of myeloid nuclear differentiation antigen distinguishes myelodysplastic syndrome from normal bone marrow, 380
- FLT3* gene, mutation in myelodysplastic syndromes, frequency and potential value for predicting progression to acute myeloid leukemia, 62
- Fluorescence in situ hybridization (FISH)
 - diagnostic yield of bone marrow and peripheral blood FISH panel testing in clinically suspected myelodysplastic syndromes and/or acute myeloid leukemia, a prospective analysis of 433 cases, 915
 - equivocal immunohistochemical results with anti-HER2/neu antibodies A0485 and SP3, comparison with corresponding results from, in routine clinical practice, 845
 - p16*, diagnostic utility of GLUT-1 immunohistochemical analysis and, in mesothelial proliferations, 619
 - UK NEQAS ISH multicenter ring study using the Ventana *HER2* dual-color ISH assay, 157
- Fluorescent antibody technique, indirect, enzyme-linked immunosorbent assay screening, then confirmation of antinuclear antibodies by, 678
- Fluorescent bead assays, results of HLA antibody testing using ELISA vs, and retrospective review of data for recipients of packed RBCs and platelets from male HLA-immunized donors, 90
- FMS-like tyrosine kinase, and *FLT3* and *NPM1* mutations in myelodysplastic syndromes, frequency and potential value for predicting progression to acute myeloid leukemia, 62
- Follicular lesions
 - CD23 expression in follicular lymphoma, clinicopathologic correlations, 46
 - predictive value of fine-needle aspiration diagnosis "suspicious for a follicular neoplasm, Hürthle cell type" in patients with Hashimoto thyroiditis, 139
- Folliculotropic T-cell lymphocytosis, as a distinct form of pilotropic T-cell dyscrasia, 221
- Fungal infections, in situ hybridization for specific fungal organisms in acute invasive fungal rhinosinusitis, 190
- Fusarium*, and acute invasive fungal rhinosinusitis, in situ hybridization for specific fungal organisms in, 190

G

- Galectin-3, and nm-23 and cyclooxygenase-2 expression could potentially discriminate between benign and malignant pheochromocytoma, 454
- Gallbladder neoplasms, early carcinoma, a clinicopathologic study of 13 cases of intramucosal, 637
- Gardnerella vaginalis*, and Affirm VPIII and Papanicolaou tests in the detection of infectious vaginitis, comparison of, 442
- Gastrointestinal diseases, Degos disease, a C5b-9/interferon- α -mediated endotheliopathy syndrome, 599
- Gastrointestinal neoplasms, visualizing pretumor progression in, 878
- Gastrointestinal stromal tumors, DOG1 antibody is a highly sensitive and specific marker for, in cytology cell blocks, 448

Gene amplification

adenosquamous carcinoma of the lung, a microdissection study of *KRAS* and *EGFR* mutational and amplification status in a Western patient population, 783

UK NEQAS ISH multicenter ring study using the Ventana *HER2* dual-color ISH assay, 157

Gene expression profiling, TLE1 immunohistochemical staining distinguishes synovial sarcoma from histologic mimics, 839

Genomic hybridization, comparative. *See* Comparative genomic hybridization

Genomics, in nationalized agenda for future of pathology in personalized medicine, 663, 668

Genotype

concordance of butyrylcholinesterase phenotype with, implications for biochemical reporting, 271

pathology consultation on warfarin pharmacogenetic testing, 13

Germ cell tumors, malignant, identification of microRNAs from the miR-371373 and miR-302 clusters as potential serum biomarkers of, 119

Germinal center, and HGAL and LMO2 in separation of lymphomas derived from small B cells in nodal and extranodal sites, including bone marrow, efficacy of, 697

Giant lymph node hyperplasia. *See* Castleman disease

Glucose tolerance test, and hemoglobin A_{1c} testing alone does not sufficiently identify patients with prediabetes, 674

GLUT-1 (glucose transporter 1), immunohistochemical analysis, diagnostic utility of *p16* FISH and, in mesothelial proliferations, 619

Graft rejection, hepatocyte cyokeratin 7 expression in chronic allograft rejection, 238

Gross cystic disease fluid protein 15, relationship between molecular subtype of invasive breast carcinoma and expression of mammaglobin and, 587

H

Hair follicle, folliculotropic T-cell lymphocytosis as distinct form of pilotropic T-cell dyscrasia, 221

Hashimoto thyroiditis. *See* Thyroiditis

Heart. *See* Myocardial infarction

Hematology analyzers, automated. *See* Automated hematology analyzers

Hematopoietic stem cell transplantation, allogeneic, donor cell-derived leukemias/myelodysplastic neoplasms in recipients of, clinicopathologic study of 10 cases and a comprehensive review of the literature, 501, 525

Hemoglobin A_{1c} testing alone does not sufficiently identify patients with prediabetes, 674

HEp-2 immunofluorescence, enzyme-linked immunosorbent assay screening for antinuclear antibodies then indirect confirmation by, 678

Heparin, unfractionated, inaccuracy of a "spiked curve" for monitoring therapy with, 870

HER2 gene

equivocal immunohistochemical results with anti-*HER2*/neu antibodies A0485 and SP3, comparison with corresponding FISH results in routine clinical practice, 845

hormone receptor status rather than *HER2* status is significantly associated with increased Ki-67 and p53 expression in

triple-negative breast carcinomas, and high expression of Ki-67 but not p53 is significantly associated with axillary nodal metastasis in triple-negative and high-grade non-triple-negative breast carcinomas, 230

UK NEQAS ISH multicenter ring study using the Ventana *HER2* dual-color ISH assay, 157

HerceptTest, and equivocal immunohistochemical results with anti-*HER2*/neu antibodies A0485 and SP3, comparison with corresponding FISH results in routine clinical practice, 845

HGAL, and LMO2 in separation of lymphomas derived from small B cells in nodal and extranodal sites, including bone marrow, efficacy of, 697

Histiocytoma, pure sarcomatoid carcinoma of maxillary sinus and nasal cavity simulating, 128

HLA antigens

HLA-DR, flow cytometry rapidly identifies all acute promyelocytic leukemias with high specificity independent of underlying cytogenetic abnormalities, 76

results of HLA antibody testing using ELISA vs the fluorescent bead method and retrospective review of data for recipients of packed RBCs and platelets from male HLA-immunized donors, 90

Hodge test, modified

clinical laboratory detection of AmpC β -lactamase, does it affect patient outcome?, 572

evaluation of a real-time PCR assay for the detection of the *Klebsiella pneumoniae* carbapenemase genes in microbiological samples in comparison with, 566

Homeostasis, calcium, multivariate analysis of clinical, demographic, and laboratory data for classification of disorders of, 100

Hormone receptors, status rather than *HER2* status is significantly associated with increased Ki-67 and p53 expression in triple-negative breast carcinomas, and high expression of Ki-67 but not p53 is significantly associated with axillary nodal metastasis in triple-negative and high-grade non-triple-negative breast carcinomas, 230

Human papillomavirus (HPV)

high-risk

population-based clinical trial comparing endocervical testing using Hybrid Capture 2 and Cervista from the SHENCCAST II study, 790

testing in women with ASC-US cytology, results from the ATHENA HPV study, 468

L1 capsid protein detection and progression of anal squamous neoplasia, 436

p16 and ProExC immunostaining in the detection of high-grade cervical intraepithelial neoplasia and cervical carcinoma, efficacy of, 212

Hürthle cells, predictive value of fine-needle aspiration diagnosis "suspicious for a follicular neoplasm, Hürthle cell type" in patients with Hashimoto thyroiditis, 139

Hybrid Capture 2

detection of human papillomavirus in oral brushings from patients with oropharyngeal squamous cell carcinoma using, 766

population-based clinical trial comparing endocervical high-risk HPV testing using Cervista and, from the SHENCCAST II study, 790

Hyperparathyroidism, multivariate analysis of clinical, demographic, and laboratory data for classification of disorders of calcium homeostasis, 100

Hyperplasia

- Castleman disease, hyaline vascular, B-cell lymphoma with features like those of, 901
- lobular endocervical glandular, aberrant expression of TFF1, TFF2, and PDX1 and their diagnostic value in, 253

I

Iatrogenic disease, pseudo-Pelger-Huët anomaly induced by medications, a clinicopathologic study in comparison with myelodysplastic syndrome-related pseudo-Pelger-Huët anomaly, 291

IDH1 gene, acute myeloid leukemia with *IDH1* or *IDH2* mutation, frequency and clinicopathologic features, 35

IDH2 gene, acute myeloid leukemia with *IDH1* or *IDH2* mutation, frequency and clinicopathologic features, 35

IGHV@ gene, and chronic lymphocytic leukemia with t(14;19) (q32;q13) is characterized by atypical morphologic and immunophenotypic features and distinctive genetic features, 686

IgM, and residual monotypic plasma cells in patients with Waldenström macroglobulinemia after therapy, 365

Immunohistochemistry

- aberrant expression of TFF1, TFF2, and PDX1 and their diagnostic value in lobular endocervical glandular hyperplasia, 253
 - β -catenin is useful adjunct immunohistochemical marker for diagnosis of pulmonary lymphangioleiomyomatosis, 776
 - DOG1 antibody is a highly sensitive and specific marker for gastrointestinal stromal tumors in cytology cell blocks, 448
 - equivocal results with anti-HER2/neu antibodies A0485 and SP3, comparison with corresponding FISH results in routine clinical practice, 845
 - GLUT-1, diagnostic utility of *p16* FISH and, in mesothelial proliferations, 619
 - gross cystic disease fluid protein 15 and mamaglobin expression, relationship between molecular subtype of invasive breast carcinoma and, 587
 - hepatocyte cytokeratin 7 expression in chronic allograft rejection, 238
 - HGAL and LMO2 in separation of lymphomas derived from small B cells in nodal and extranodal sites, including bone marrow, efficacy of, 697
 - histologic and immunohistologic characterization of skin localization of myeloid disorders, a study of 173 cases, 278
 - HPV L1 capsid protein detection and progression of anal squamous neoplasia, 436
 - monocytic leukemia analysis, usefulness of CD14 and Krüppel-like factor 4, a novel monocyte marker, 720
 - multisite performance study comparing the reading of slides on a computer monitor with conventional manual microscopy for estrogen and progesterone receptor analysis, 461
 - primary adenocarcinoma of the urinary bladder, value of cell cycle biomarkers, 822
 - TdT expression in Merkel cell carcinoma and small cell lung carcinoma, 831
 - TLE1 staining distinguishes synovial sarcoma from histologic mimics, 839
- Immunophenotyping, by flow cytometry
- assessment of T-cell clonality by V_{β} repertoire analysis, detection of clonality at diagnosis and monitoring of minimal residual disease following therapy, 878

CD23 expression in follicular lymphoma, clinicopathologic correlations, 46

of cerebrospinal fluid specimens, 22

combined core needle biopsy and fine-needle aspiration with ancillary studies correlate highly with traditional techniques in the diagnosis of nodal-based lymphoma, 516

independent diagnostic accuracy of flow cytometry obtained from fine-needle aspirates, a 10-year experience with 451 cases, 304

rapidly identifies all acute promyelocytic leukemias with high specificity independent of underlying cytogenetic abnormalities, 76

residual monotypic plasma cells in patients with Waldenström macroglobulinemia after therapy, 365

Immunostaining, p16 and ProExC, in detection of high-grade cervical intraepithelial neoplasia and cervical carcinoma, efficacy of, 212

Indirect fluorescent antibody technique. *See* Fluorescent antibody technique, indirect

Thrombotic microangiopathies, and thrombotic thrombocytopenic purpura and urinary tract infections, is there a connection?, 85

Thrombotic thrombocytopenic purpura

and thrombotic microangiopathic hemolytic anemia with reduction of ADAMTS13 activity, as initial manifestation of childhood-onset systemic lupus erythematosus, 406

and urinary tract infections, is there a connection?, 85

Thyroiditis, Hashimoto, predictive value of fine-needle aspiration diagnosis "suspicious for a follicular neoplasm, Hürthle cell type" in patients with, 139

Thyroid neoplasms

clinical outcome for atypia of undetermined significance in thyroid fine-needle aspirations, should repeated FNA be the preferred initial approach?, 770

interobserver reproducibility of fine-needle aspiration using UK Royal College of Pathologists' classification system, 852

predictive value of fine-needle aspiration diagnosis "suspicious

- for a follicular neoplasm, Hürthle cell type" in patients with Hashimoto thyroiditis, 139
- repeatedly nondiagnostic fine-needle aspirations, significance of, 750
- Time factors, effect of delay in fixation, different fixatives, and duration of fixation in estrogen and progesterone receptor results in breast carcinoma, 592
- Tissue fixation, effect of delay and duration in, and different fixatives, in estrogen and progesterone receptor results in breast carcinoma, 592
- Tissue repositories, pathology archive, evaluation of integrity, regulatory compliance, and construction of searchable database from print reports, 753
- Transducer-like enhancer of split-1, immunohistochemical staining for distinguishes synovial sarcoma from histologic mimics, 839
- Transfusion, effects of computerized decision support system on physician compliance and its appropriateness for fresh frozen plasma use in a medical center, 417
- Transfusion-related acute lung injury, and results of HLA antibody testing using ELISA vs the fluorescent bead method and retrospective review of data for recipients of packed RBCs and platelets from male HLA-immunized donors, 90
- Translocation, genetic
 - chronic lymphocytic leukemia with t(14;19)(q32;q13) is characterized by atypical morphologic and immunophenotypic features and distinctive genetic features, 686
 - comparative analysis of molecular genetic and conventional cytogenetic detection of diagnostically important, in more than 400 cases of acute leukemia, highlighting the frequency of false-negative conventional cytogenetics, 921
 - TLE1 immunohistochemical staining distinguishes synovial sarcoma from histologic mimics, 839
